

CYP2D6: sotalol

2539/2540/2541

IM = intermediate metaboliser (gene dose 0.25-1) (reduced CYP2D6 enzyme activity), PM = poor metaboliser (gene dose 0) (absent CYP2D6 enzyme activity), UM = ultra-rapid metaboliser (gene dose ≥ 2.75) (elevated CYP2D6 enzyme activity)

	IM	--	no	no	
	UM	--	no	no	

Mechanism:

Sotalol is not metabolised. A total of 80-90% of the dose is excreted in unchanged form via urine and the rest is excreted via faeces.
